

Denton Steel Building Pty Ltd – Australian Steel Solutions Built to Perform

About Us

Proudly 100% Australian-owned and operated, Denton Steel Building Pty Ltd specialises in the supply and build of durable, high-performance steel structures. Since 2020, we have built a reputation as a trusted partner across diverse industries, delivering bespoke, client-focused solutions that provide lasting value, always on time and precisely to specification.

At Denton Steel, quality is non-negotiable. That's why we exclusively use premium materials from Lysaght respected brands within BlueScope Steel. Each structure we deliver is engineered and constructed to fully comply with Australian building standards and specifically designed to endure Australia's challenging and variable climate.

Our Mission

To deliver cost-effective, customised steel buildings using trusted Australian materials, expert craftsmanship and end-to-end service, ensuring strength, integrity and long-term value for every client.

Years in Operation

- **Over fifteen years experience**
- ABN: 87 641 614 548
- Business Structure: Private Company (Pty Ltd).

What We Build

Denton Steel supplies and builds a wide range of structures for residential, rural, commercial and industrial use.

Sheds

- Workshop sheds
- Machinery and storage sheds
- Equipment sheds.

Garages & Carports

- Single/double/multi-bay garages
- Attached or freestanding designs
- Gable, skillion or flat-roof carports.

Commercial & Industrial Structures

- Warehouses and workshops
- Storage facilities
- Retail or office buildings.

Covered Outdoor Areas

- Patios
- Verandahs
- Alfresco entertainment spaces.

Our Materials & Suppliers

We build exclusively with Ranbuild designs and Lysaght manufactured products who are long-standing leaders in Australian steel manufacturing.

Ranbuild provides pre-engineered steel building designs that are versatile, scalable and compliant with ShedSafe accreditation. Lysaght, a division of BlueScope Steel, supplies all materials, including roofing and cladding products, made using COLORBOND® and ZINCALUME® steel, which are proven to perform in Australian conditions.

All materials we use are Australian-made, tested for durability and backed by manufacturer warranties, offering peace of mind to our clients and long-term value in every project.

Our Services

We offer a complete, turnkey solution from concept to completion:

- **Free Quotes & Transparent Pricing**
Detailed, no-obligation quotes with clear breakdowns of materials, labour and timelines.
- **Custom Supply Solutions**
Supplying tailored steel structures based on client specifications and certified engineering plans from trusted suppliers like Ranbuild.
- **Site Preparation & Concrete Slabs**
Full groundwork and concrete services, including slab pouring and footings.
- **Delivery & Build**
Professional supply and on-site construction by licensed, experienced steel building contractors.
- **Council Approvals & Compliance**
Assistance with permits, council paperwork and compliance with local building codes.
- **Project Management**
Complete oversight of your build, ensuring quality, communication and on-time delivery.
- **After-Sales Support**
Ongoing support, product warranties and maintenance advice for peace of mind.

Why Choose Denton Steel?

Denton Steel brings together national-grade materials with the responsiveness and accountability of a local, hands-on contractor. We are proudly Australian-owned and committed to building with purpose, no shortcuts, no compromise.

With more than fifteen years of operational experience, our team delivers projects that balance technical expertise with real-world practicality. Our structures are designed to withstand Australia's harsh climate, engineered to code and customised to meet each client's unique requirements.

As an Accredited Ranbuild Dealer, we supply and build exclusively with proven, Australian-made materials from trusted suppliers Ranbuild and Lysaght. Every build is underpinned by compliance, certified workmanship and a transparent, end-to-end process.

When you work with Denton Steel, you get more than a structure, you get a building partner that stands behind every job, every time.
